AI Summary — What Your Scan Shows

Your scan showed one small nodule measuring about 5 mm in the right lower lung. The AI assessment rates it as "low risk," with a very small chance (about 3%) of being concerning, and it does not require urgent follow-up. It's still a good idea to discuss these results with your doctor at your next appointment. This is an AI-assisted analysis and should be reviewed by a qualified medical professional.

This summary is generated by AI and should be reviewed with your doctor.
